SUMMARY OF SKILLS AND QUALIFICATIONS

Operating Systems | Windows 10 • Windows 11 • Mobile • Linux

Development Practices & Tools | Agile • Scrum • CI/CD • GitHub • Azure DevOps

Technical Skills | Git • Java • TypeScript • JavaScript • React.js • React Native • Node.js • Html • CSS • SCSS • MongoDB • Express • StencilJS • Expo • Puppeteer • Jest • Mocha • Chai • C • Python

Languages | French & English | Spoken & Written – fluent

EDUCATION

Bachelor of Engineering – Software Engineering Co-op

2024 – 2027 (Expected)

Concordia University, Montreal, QC

- Member of the Institute for Co-operative Education
- GPA 3.77
- Relevant Courses: Object Oriented Programming, Web Programming, Data Structure and Algorithms, Operating Systems

DEC in Natural Science

2023

Bois-de-Boulogne College, Montreal, QC

WORK EXPERIENCE

Software Developer

January 2025 – May 2025

Genetec, Montreal, Quebec

- Collaborated with a team of 5 developers to build and maintain Genetec's design system, significantly impacting multiple teams and projects across the company.
- Developed reusable, web components using **TypeScript** and **StencilJS**, ensuring compatibility across **HTML**, **React**, and **Angular** platforms.
- Implemented unit and visual tests, utilizing **Jest** and **Puppeteer**, to ensure the reliability of components.
- Contributed to the development and maintenance of **Storybook**, serving as an interactive reference to showcase and document components used across various Genetec applications.
- Identified and fixed bugs, continuously improving component functionality.
- Utilized **Git** for version control and worked within **Azure DevOps**.

PROJECTS

Full Stack Paper Trading Platform

React | Node

- Co-created and developed a paper **trading platform** allowing users to simulate trading U.S. equities using **real-time** market data provided by the **Finnhub API**.
- Designed a dynamic and interactive user interface with **React.js**, enabling users to manage trades and track their performance in a risk-free environment.
- Implemented the backend using **Node.js** and **Express** to handle server-side operations and **MongoDB** for data management.

Peer Review Service

React | Node | Mocha | Chai

- **Led a team** of 7 developers to build a full-stack peer review service, enabling students to review their peers, and professors to manage grades, reviews, students, and classes. Coordinated project tasks, applied **Agile** practices, and mentored teammates to ensure smooth collaboration and on-time delivery.
- Implemented a global state manager using **React Context API** to efficiently manage and share state across the application, improving performance and scalability.
- Implemented a pipeline for **Mocha** and **Chai** testing in **GitHub Actions**, automating test execution for continuous integration.

Machine Learning Market Forecaster

Python | Pandas | yFinance API

- Developed a market forecasting tool that predicts Bitcoin and S&P 500 prices using **machine learning** models based on historical data.
- Utilized multiple **Python** libraries including **pandas**, **yfinance**, **scikit-learn**, and **matplotlib** to gather, preprocess, and analyze financial data.
- Designed a **back testing** mechanism to evaluate model predictions, ensuring robust and reliable forecasting over time.

Othello Game

Java

- Developed a fully functional Othello game in **Java**, implementing the game's core mechanics.
- Utilized **Java**, **Object-Oriented Programming principles**, and **UML** class diagrams to design and implement a scalable and maintainable architecture.

Hackathons**AI-Powered Fishing Assistant** | Winner PolyHacks 2025

React Native | Expo

- Built a **mobile app** using **React Native** and **Expo** to promote sustainable fishing practices, winning **1st place** at PolyHacks 2025. The app identifies fish species and verifies Quebec fishing regulations through in-app photos.
- Integrated an **AI** image recognition model to analyze photos and accurately identify fish species.
- **Web-scraped** Quebec's fishing regulations to ensure legal compliance for each identified species.
- Thrived in a fast-paced, competitive hackathon environment by making critical, business-driven decisions that led to the app's success and win.

CasperAI | McHacks 2025

React | Node | OpenAI API

- Developed an AI-powered platform to help students prepare for the CASPer situational judgment test, providing realistic practice scenarios with actionable feedback on empathy, ethics, and decision-making.
- Integrated the **OpenAI API** for natural language processing to assess user inputs and improve their responses for CASPer preparation.
- Implemented backend functionality with **Node.js** and **Express** to handle AI computations and integrate with **MongoDB** for secure data storage.

AWARDS & DISTINCTIONS**RSEQ Meritas****2023**

Men's Volleyball D2, Bois-de-Boulogne College

- Recognized as a student-athlete maintaining a general average above 80% in the Natural Science program.
